Career Summary

Senior Microsoft Dynamics 365 / Power Platform Developer with 16+ years of hands-on experience designing, customizing and integrating enterprise CRM solutions. Since 2016 I have led Dynamics 365 development for the Israel Courts Administration, building heavy systems from vanilla, introducing Git-based workflows and streamlining case-management for thousands of end-users. Deep expertise in C#, .NET, Dataverse, SQL Server, HTML5/JavaScript; certified Microsoft Specialist in Extending Dynamics CRM 2013, Customization & Configuration (2013). Known for clean architecture, performance tuning and mentoring teams to deliver secure, maintainable code that powers mission-critical government processes. Comfortable using AI coding assistants to accelerate routine tasks while keeping architecture and critical code under human control.

Experiences

Senior Dynamics 365 Developer / Israel Courts Administration 2016 - 2025 (9 years)

Full-cycle Microsoft Dynamics 365 development, including:

- Design and implementation of synchronous / asynchronous plugins with
- Power Automate (Flows), Power Apps, Workflows, Actions
- Client-side JavaScript: command-bar buttons, form logic, Web API integrations, AJAX
- Creation of external integration services (REST / SOAP)
- Console C# applications for scheduled and batch processes
- Data-import pipelines from Excel and third-party systems
- Design and development of SSRS reports
- Direct performance tuning and troubleshooting in Microsoft SQL Server
- ASP.NET MVC portals with secure one-way data-synchronisation mechanisms
- Source-control workflows with Git / TFS
- Power-user of XrmToolBox and companion utilities
- SharePoint integration
- System customization & configuration

Dynamics CRM Developer / Taldor

2014 - 2016
